

## Nia Covid-19 food packages

*Supporting the children and their families with food supplies during this difficult time*

Nia Children's Foundation supports two schools in the slums of Nairobi, Kenya with food supplies, allowing the children to have a daily breakfast and lunch. Due to Covid-19 these two schools have had to close, and all 765 kids have been at home for over a month now. The lockdown has resulted in a lack of work, resulting in families struggling with the basics.

Our team on the ground are working with our suppliers to put together food packages of rice and beans and get them to these children's households. Each food package consists of 5kg rice and 5kg beans and costs roughly £10. Each food package will feed a family of 5 for one week. We have already sent out 200 packages and are planning to send out a further 400 packages by the end of May.

Any support that can be offered would be greatly appreciated.

## About Nia Children's Foundation

Nia Children's Foundation works with local African suppliers to provide food supplies and educational materials to non-government run schools in Africa's poorest areas. This ensures that children attend school and receive regular meals enabling them to become healthier and more focused in class. The Foundation currently supports two schools in Nairobi, Kenya feeding and educating over 765 children breakfast and lunch every day.

**It costs just £5 to feed and educate ONE child for an ENTIRE month**

### Where does your money go?

- 97% of donations received are used directly to pay for the food supplies and educational materials.
- Less than 3% of donations are used for admin costs which include bank transfer charges to Kenya and the maintenance of online donations.
- NO donations are used in wages or expenses. Our finances are extremely transparent and supporters can see exactly where every single penny of their donations are being spent.

The word *Nia* means *life's purpose* in Swahili, the language spoken in Kenya. In our eyes ensuring these children are healthy and receiving an education allows them to provide for themselves in the future...  
*this is our life's purpose.*
